

Syntax CxLink for ArchiveLink paves the way for SAP innovation in the cloud.

Your cloud journey may be a quest for scale and agility, or to leverage powerful hyperscaler cloud platforms that you can access from within your SAP applications. Either goal gets you to the same destination of innovating more with your SAP investments.

And the road to innovation is paved with the documents for the applications, tools, compliance and archiving issues, transaction details that simultaneously propel and chronicle the cadence of your business.

Every enterprise needs to process countless documents and data archives for proper operation. Invoices, sales orders, or purchase orders or extensive financial & tax files are examples of the types of documents needed to support every business process.

The positive impact of each advance in document management innovation may sometimes reverberate throughout your business.

CxLink for ArchiveLink is designed to leverage the innovations delivered by hyperscalers and embed them into the product. For example:

- It is an SAP-Certified Native Application, written in ABAP and leverages the ABAP Software Development Kit for cloud platforms.
- It is maintained by Syntax and is regularly updated with the latest Cloud platforms like AWS or Microsoft Azure and SAP features and functions, providing the most robust document management solution available. That is you can be confident in not worrying about and dedicate your resources toward addressing other business challenges.
- It leverages hyperscalers' object storage services to store SAP documents contributing to a more efficient, reliable, and cost-savvy setup.

CxLink for ArchiveLink is a purpose-built solution to unlock innovations:

For organizations running SAP, transitioning to the cloud can present challenges. Once the migration is complete, navigating updates and innovations can also be complex within the SAP ecosystem. While SAP provides solutions for integrating with cloud hyperscalers, these solutions comes with their own costs and set of functionalities compared to what cloud hyperscalers directly offer. Hence, selecting the right solution is critical based on business and IT needs.

CxLink for ArchiveLink is offered as a single-source answer to the your issues related to documents and archives that you encounter while running SAP on cloud. It is a Software as a Solution package specifically optimized for hyperscaler cloud platforms, which is maintained by Syntax and is regularly updated with the latest cloud platforms and SAP features and functions, providing the most robust solution available for documents and data archives management.

Key features:

- An SAP-certified software add-on to SAP ERP, SAP S/4 HANA, and any SAP NetWeaver-based application.
- Uses hyperscalers object storage services for storing SAP documents, archives and unstructured data.
- Fully integrated with the SAP document and archive management module (GOS/DMS).
- SAP Archivelink compatible.
- It has integrated security features:
 - HTTPS communication with SSL certificates between SAP and cloud hyperscaler
 - Encryption supported on client (SSF) and with cloud native Key Management Services (KMS)
 - IAM Policies for restricted access
- Customizing and management console built with SAP Webdynpro and SAP Fiori.
- Easy add-on, deployment and integration:
 - Packaged Add-On using SAP Add-On Assembly Kit
- Licenses are available in one- or three-year terms.

Main benefits:

▪ Simplification

Having less infrastructure to manage because of CxLink for ArchiveLink being a serverless solution, and the ability to consume hyperscaler technologies sooner and more easily.

▪ Resiliency

Building on AWS/Azure Global Infrastructure was a choice for the most resilient cloud option by design.

▪ Enhancements

Enrich your SAP applications with cloud platforms capabilities and enjoy ongoing updates and integration of your SAP applications with hyperscaler's cloud-native services.

▪ Cost Reduction

Lower costs across software, infrastructure and operating areas associated with your SAP deployment, including hidden costs, such as linking document retention policies with Amazon S3 or Azure Blob Storage classes to optimize cost savings.

▪ Support

Enjoy support for all CxLink Products with a dedicated team of specialists.
