Expertise in
CSPE: Oracle Cloud Platform - Oracle E-Business Suite Applications to Oracle Cloud in North America

Migrate and upgrade your Oracle E-Business Suite solution to a modern, high-performance, supported platform

In today's rapidly evolving digital landscape, customers are looking to the cloud for strategic advantage while also being tasked to do more with less. Regardless of how far your organization is in its cloud journey, using Oracle Cloud Infrastructure (OCI) to host your Oracle E-Business Suite (EBS) solution can provide the right mix of performance, scalability, and cost savings to help you keep pace with the needs of your business.

With a global data center footprint and the only fully certified cloud solution designed to work with Oracle EBS, OCI is a great choice for customers who desire many of the benefits of cloud but are not able or willing to implement Oracle Fusion Cloud Applications.

Oracle Cloud Lift Partner + **Oracle Cloud Solutions Provider**

YOUR ONE-STOP PARTNER FOR OCI

- ✓ Free Cloud Lift Benefits
- ✓ Special Cloud Solutions Provider (CSP) Discounts
- ✓ Flexible OCI Terms
- ✓ Support Rewards Credits
- ✓ Oracle-Certified Deployments
- ✓ Multicloud Enabled
- ✓ License/Support Optimization

- **Are you looking to improve performance, agility, or scalability?**

  New subscription technology licensing options offer the ability to scale seasonally, the ability to improve performance with no interruption in uptime, and the ability to flex your Oracle EBS non-Production environments without the need for perpetual licenses.

- **Is your Oracle EBS running on older hardware or an inflexible data center architecture?**

  Syntax can move most Oracle EBS systems to OCI seamlessly, with minimal downtime and without any impact to the application. Migrating to a modern, high-performance compute and storage architecture allows you to deliver immediate efficiency benefits to your user community.

- **Are you worried about end-of-support dates and don't think you have the money to modernize?**

  Customers running older versions of Oracle EBS can migrate and upgrade to OCI more easily than ever, with less disruption than ever. By minimizing

functional changes in the applications, Syntax can get you onto a modern, supported Oracle EBS platform that provides greater stability and security. We can build a roadmap to take advantage of new functionality, and you can take advantage of it at your own pace.

- **Are you in support limbo?**

  Customers who opted to move from Oracle Support to third-party support, or even let their support agreements expire altogether, often find that they eventually need to upgrade to support operating system, browser, and Java requirements. Syntax can work with you to get your Oracle Support agreements reinstated without penalty and reduce the annual cost with the Oracle Support Rewards program.

- Production	- Identity Cloud Service
- Production Burst Capacity	- Integration Cloud Service
- Project Environments	- Analytics Cloud Service
- Disaster Recovery	- Developer Cloud Service
- Subscription PaaS Services	- Fusion Cloud Applications

Why Syntax for Oracle EBS on OCI

Syntax has been hosting Oracle EBS for 25 years, and has been working with OCI since 2018. We are an Oracle Sales Partner, an Oracle Service Partner, an Oracle Cloud Lift Preferred Partner, and an Oracle Cloud Solutions Provider, plus our solutions for Oracle EBS on OCI are validated by the OCI Engineering team.
