A SYNTAX COMPANY

# Accelerated ERP for Mining

Makes SAP Software work for you quickly and at a surprisingly affordable price

As they begin growing and opening new mines, often in different countries around the world, small and medium sized mining companies deal with a new level of operational management challenges – often not supported by their existing IT systems. Given their size and the vast resources required during the exploration stage, Mining IT managers tend to believe that their companies would not be able to afford an implementation of a fully-fledged enterprise management system like SAP®.

Our accelerator is built on top of SAP® S/4HANA and is designed to facilitate rapid implementation of the software for small and medium sized Mining companies.

## Solution

Illumiti has packaged its SAP® implementation experience with small & mid-sized mining companies into a Mining solution accelerator—enabling our highly professional teams to complete typical projects at an exceptionally fast pace.

Illumiti's Mining solution accelerator includes pre-configured business processes based on industry best-practices supporting requirements in areas including Financials, Production Reporting, Procurement, Maintenance, Capital Projects, Fixed Assets and Business Intelligence.

Our accelerator is built on top of SAP® S/4HANA and is designed to facilitate rapid implementation of the software for small and medium sized Mining companies.
