

Oracle E-Business Suite Enterprise Command Centers (ECC)

ECC helps Oracle EBS users to identify and act on priority transactions without custom operational reporting.

Advanced Data Analytics for Oracle E-Business Suite (EBS)

Oracle EBS Enterprise Command Centers are the latest major development in the E-Business Suite user interface and consist of configurable dashboards that aggregate data in a single view to the end user in a functional area. Using sophisticated charts and reports, users can drill down into the data without the need for development, allowing them to make better decisions faster.

What Do ECCs Cost to Implement and Maintain?

Oracle EBS ECCs come bundled with your existing E-Business Suite licensing. There may be implementation costs to enable, configure, and enhance them for your E-Business Suite deployment, but this typically only takes a few days of work by a managed services provider like Syntax.

Our Application DBAs complete the configuration, enable monitoring and backups, and ensure the technical aspects of the ECC configuration are rock solid. At that point they are ready to use. Optionally, our functional consultants and developers step in to fine-tune the dashboards and integrate into your unique business processes.

From a maintenance perspective, there are technology components that run the Enterprise Command Centers that must be maintained on the server that will require additional DBA hours, but these are generally not significant.

KEY FEATURES

- ✓ Actionable indicators
- ✓ Consumer-like search and filters
- ✓ Instant search results
- ✓ Search across organizations
- ✓ Saved search for frequently used filters
- ✓ Interactive visualizations
- ✓ Guided navigation
- ✓ Data visualization using tag clouds
- ✓ Customizable charts and reports
- ✓ Fully integrated with Oracle EBS security and page flows
- ✓ Available for desktop and mobile devices
- ✓ Multilingual Support (MLS)
- ✓ Extensible with Oracle ECC Framework

What ECCs Are Available for Oracle EBS?

Oracle EBS Development rolls out new functionality twice a year. Current available ECCs include:

- **Financials:** Receivables, iReceivables, Payables, Assets, Lease Contracts, Lease and Finance Management.
- **Procurement & Projects:** iProcurement: Consumer-Like Shopping, Procurement, Projects, Project Procurement, Contract Lifecycle Management for Public Sector.
- **Order Management & Logistics:** iStore: Modern Shopping Experience, Advanced Pricing, Order Management, Inventory Management, Landed Cost Management, Channel Revenue Management, Incentive Compensation.
- **Manufacturing:** Discrete Manufacturing, Process Manufacturing, Outsourced Manufacturing, Cost Management, Quality.
- **Asset Lifecycle & Service:** Enterprise Asset Management, Asset Tracking, Service Contracts, Service (TeleService), Field Service, Depot Repair.
- **Human Capital Management:** Human Resources.

KEY BENEFITS

- ✓ Free with Oracle EBS licensing
- ✓ Deploy rapidly, with no change to the Oracle EBS database
- ✓ Leverage out-of-the-box user interface and security integration
- ✓ Access from mobile or desktop devices
- ✓ Quick user adoption
- ✓ Improve data communication with support for a variety of visualizations and charts
- ✓ Analyze structured and unstructured Oracle EBS data
- ✓ Meet new business requirements through configuration instead of coding
- ✓ The ability to update dashboard design and visualizations
- ✓ The ability to expose additional data in the EBS instance on the dashboard

How Can Syntax Help?

Syntax can get you started on the road to a successful ECC rollout by providing:

- **ECC Demonstration and Overview** – A free, one-hour overview of ECC functionality along with a demonstration of up to three dashboards of the customer's choosing.
- **Quick Start Service** – A three-day functional Quick Start with technical implementation services to patch and configure the ECC server, along with functional implementation services to stand-up the ECCs of your choice in your environment.
- **Production Rollout Service** – Includes a complete rollout of ECC functionality in your Production environment, including the integration of the ECC server into your operational processes. Syntax consultants will configure your chosen ECCs to work with your Oracle EBS implementation. Pricing is dependent on the number of ECCs you choose to implement. Service includes an implementation in a non-Production environment, followed by a go-live in Production.
- **ECC Enhancement Services** – Syntax consultants will utilize the ECC Framework to extend your existing Command Center deployments, including new charts and reports, based on requirements gathered from the user community.
