

SSR Mining: A quest for business optimization through ERP integration

SSR Mining, Inc. is a cash flow focused intermediate gold company with four operational assets in the USA, Turkey, Canada, and Argentina, combined with a global pipeline of high-quality development and exploration assets. Over the past 3 years, their assets have yielded an average annual output exceeding 700,000 gold equivalent ounces.

To improve the integration of asset management, logistics, and finance processes, SSR Mining decided to replace its legacy systems and applications with a scalable, secure, cloud-based, integrated ERP solution. As a result, it now has harmonized business processes and greater clarity and visibility across business operations.

Unlocking efficiencies across the business with SAP S/4HANA Cloud Private Edition

Before: Challenges and opportunities

- Following the 2020 merger with Alacer Gold, SSR Mining sought a comprehensive ERP solution to enhance operational visibility and harmonize business processes. It needed a system capable of providing robust support to their global operations while offering adaptable localization options.
- Opted for a greenfield implementation of RISE with SAP S/4HANA Cloud Private Edition

Why SAP and Syntax

- SAP has extensive industry experience and unparalleled functionality tailored for the mining sector.
- Collaborated with Syntax due to longstanding partnership with Alacer Gold, dating back to 2012
- Leveraging Syntax's global mining template, SSR Mining was able to deploy a global template that could be leveraged across multiple mine sites globally.

After: Value-driven results

- Successful global implementation, including the United States, Canada, and Turkey in January 2024
- By consolidating three ERPs into one, SSR Mining now benefits from a comprehensive view of its global operations through SAP's embedded analytics.
- With a single source of truth, SSR is empowered to optimize business management on a global scale while also reducing IT support costs through the consolidation into a unified cloud-based solution.
- Modernizing integrated maintenance supply chain and finance processes on a global scale.

“With the help of Syntax’s industry expertise, our adoption of SAP S/4 HANA Cloud Private Edition has established a foundation for us to unlock efficiencies and evolve into an **insights-driven company.**”
