

SAP on AWS: migration made clear

Companies are expressing a desire to move to the cloud—but a lack of resources and knowledge continue to hold them back.

That's why AWS partners with SAP experts like Syntax. We work with clients to assess their readiness and identify challenges before they become roadblocks—so clients can achieve a secure, cost-effective migration to AWS.

15%

rise in cloud adoption this year alone

73%

of non-cloud users are considering cloud services

45%

of companies lack cloud migration talent

Top 4 benefits of partnering with Syntax to help with your SAP on AWS migration

40+
years experience
with SAP

01

A shortened migration timeline free of major disruptions

435
AWS certifications

We're an AWS Premier and Managed Service Provider with a 100% AWS-certified team. With SAP experience spanning more than four decades and in-depth knowledge of SAP on AWS, we know which questions to ask and how to find your most direct and efficient path forward.
