SYNTAX CxLink for ILM

Optimize SAP ILM with AWS Cloud functionalities and ensure data compliance

- Maintained by Syntax and regularly updated with the latest cloud hyperscaler functionalities

- Acts as an SAP add-on that enables companies to use Amazon S3 as SAP ILM-enabled without an intermediate server

SAP Platinum Partner

Overview

The evolution from data archiving to SAP Information Lifecycle Management (ILM) signifies a substantial shift in how organizations manage and utilize their data. With the advent of SAP ILM, the focus has broadened to encompass compliance, protection, and the optimal management of information throughout its entire lifecycle.

Syntax CxLink for ILM makes it easier by seamlessly connecting SAP ILM with AWS Cloud and securely optimizing data management on the cloud throughout its lifecycle. From data creation to archiving and final disposal, this SAP-certified solution ensures that data is managed in compliance with regulatory requirements while leveraging the cloud advantages, such as scalability, cost effectiveness, and high availability.

Key Features

- Optimize system performance by archiving outdated data to AWS Cloud while preserving the business context, reducing the burden on active transactional systems

- Implement rule-based retention management to control how long data is stored on AWS Cloud and when it can be destroyed, ensuring compliance and mitigating risks

- Securely transfer legacy data to a central retention repository during the transition to SAP Cloud ERP, ensuring continuous access to critical information

- Automate the processes of blocking, archiving, and deleting data based on predefined rules using the power of AWS Cloud native technologies

- Integrate SAP ILM with AWS Cloud to provide a unified approach to data archiving and governance

- Configure and retrieve data grouped by specific business functions and ensure compliance with tax regulations or product liability requirements

Key Benefits

- **Reduced TCO:** Storing all SAP attachments and archiving sessions in the cloud reduces database size, leading to significant cost savings

- **Zero IT footprint:** Available as an SAP add-on, it is installed in the customer's own ERP system, omitting the need for intermediate servers between SAP and cloud providers

- **Unlocking innovation:** Makes SAP data available across the business in a centralized repository, unlocking the possibility of applying new technologies, like AI, to these documents

- **Ensure security and compliance:** Fully compliant with all applicable archiving and data document retention rules and regulations
